

— LINKEDINIA · BY OPENCENTERAI

You don't have time for LinkedIn. We do.

Our technology spots the conversations that matter to you and replies with precision, in your voice. **You approve in one tap.**

453

posts

263

● in **14 days**, on a real account

— THE PROBLEM

A LinkedIn presence that counts is a half-time job.

~1 hour

Find the right post, read the whole feed, write well, track the impact.

Every single time.

~2 hours

A profile post with an infographic.

Design included.

Nobody keeps that pace. You publish **in fits and starts**, then nothing.

| Your expertise only counts if it's seen.

— THE PROOF, ON A REAL ACCOUNT

7 days. +1,174% impressions.

Jun 9 – Jun 15

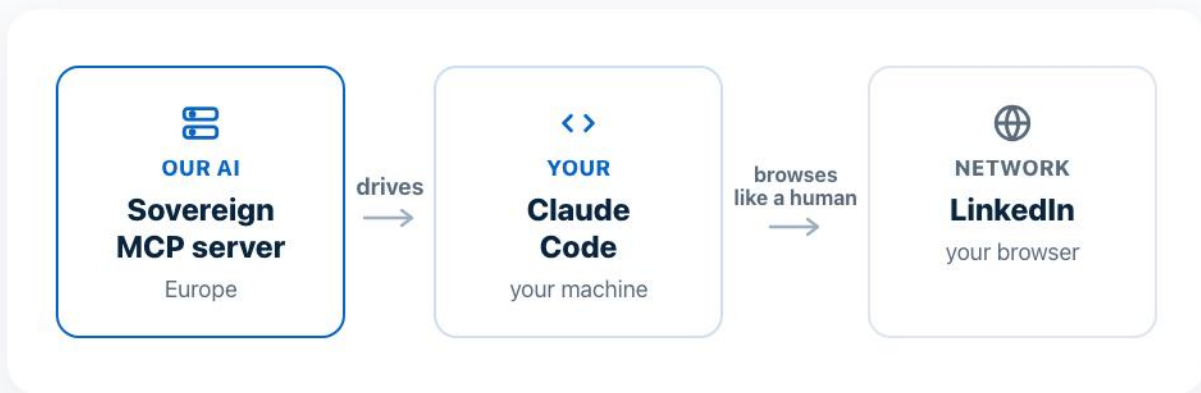

Real LinkedIn analytics from a **real account**, run by LinkedInIA — without posting anything yourself.

— HOW IT REALLY WORKS

Our AI drives your Claude Code.

- ⚙️ Our **sovereign MCP server** decides what to say, where, and writes in **your voice**.
- ⏪ Your **Claude Code**, installed on your machine, runs it: it browses LinkedIn **like a human**, from your browser.
- ✅ The brain is ours, **the actions come from your browser** — smart server-side, safe on the publishing side.

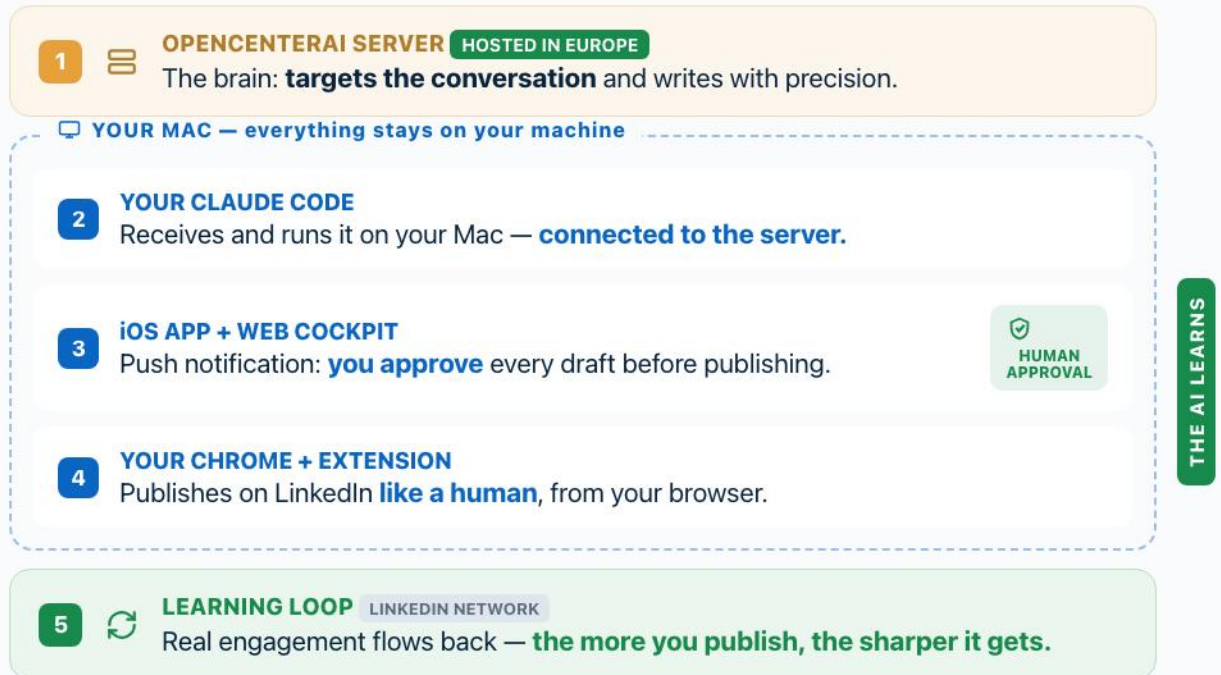

The brain is ours, the **actions come from your browser**.

— HOW OUR SYSTEM WORKS

The architecture of LinkedInIA.

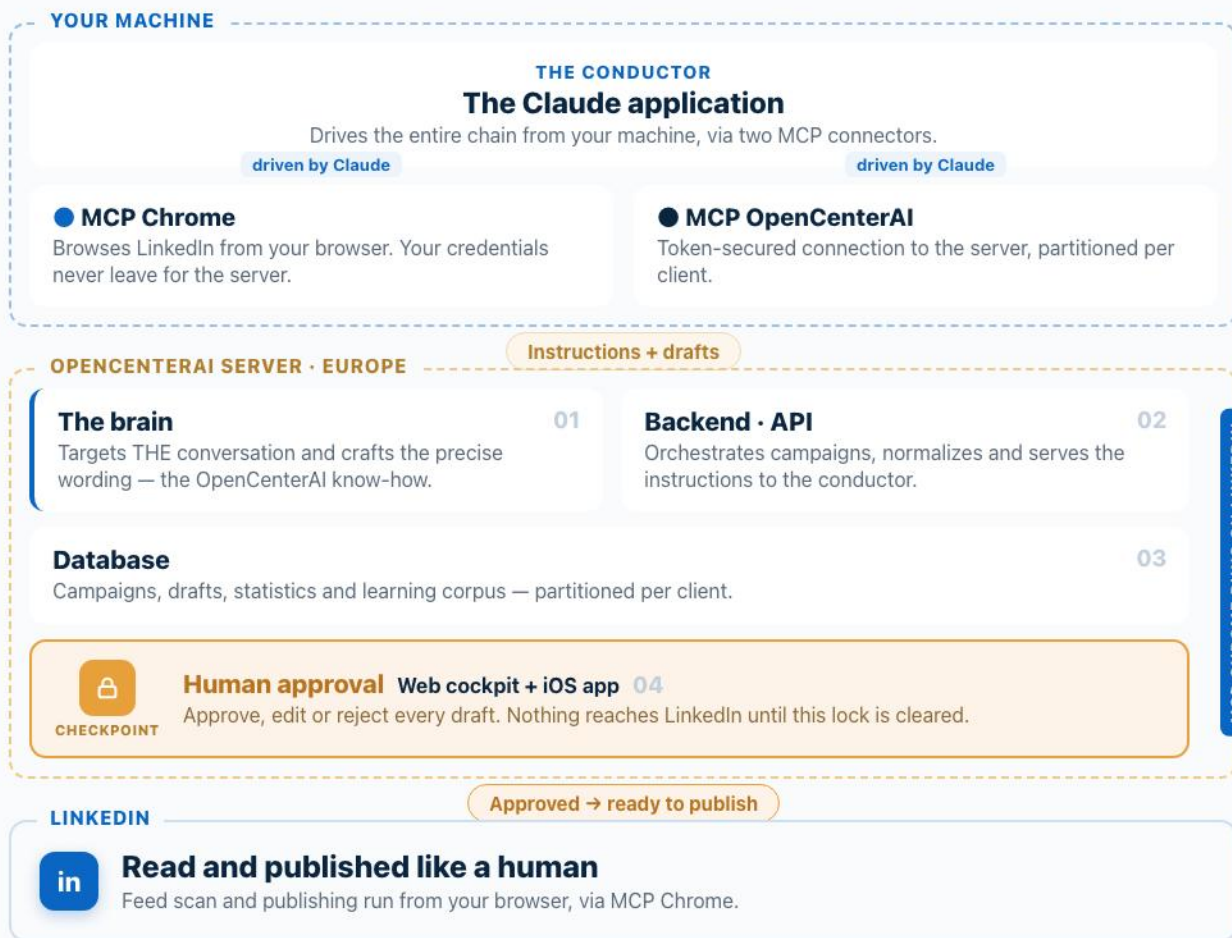

● Remote — outside your machine ● On your Mac ● Continuous learning

This is not a bot. LinkedIn penalizes robots; our system browses **like a human**, with human actions from your browser, and **every publication is approved by you.**

The technical chain

End-to-end architecture — the human approves before every publication.

THE JOURNEY OF ONE PUBLICATION, STEP BY STEP

— SECURITY

Everything runs on your side.

Our server drives **your** Claude Code, on **your** machine. Publishing happens from **your** browser, and nothing happens without you.

ON YOUR MACHINE

Our server drives your Claude Code, which runs **on your machine** — **your access stays local.**

FROM YOUR BROWSER

Publishing happens from **your browser**, with **human actions.**

SOVEREIGNTY

Sovereign hosting in Europe — and nothing is published without **your approval.**

— DAY TO DAY

It reads, it follows, it writes.

Each day, our AI and its MCP server drive your Claude Code — three simple actions, from the feed to text ready to approve.

1

IT READS

It reads your news feed and spots **THE conversation that counts.**

2

IT FOLLOWS

It follows your interactions: **every reply you receive** is handled.

3

IT WRITES

It writes comments, replies and posts — **in your voice**, in the post's language, accounting for **the WHOLE thread.**

— YOUR PLATFORM

You control everything. On the web and on your iPhone.

Approval, statistics, configuration, campaign management, cadence, the detail of every post — all in one place.

ON THE WEB

— THE PLATFORM · APPROVAL

Approve each proposal in one tap.

✓ Every comment, reply or post is proposed to you. **Approve, edit or reject.**

✓ **Nothing is published without you.**

✓ **You keep the final say**

— THE PLATFORM · PUBLICATIONS

The detail of everything published.

Every post, comment and reply — with **the engagement earned** (reactions, comments).

Your **full history**, always **within reach**.

— THE PLATFORM · STATISTICS

Your results, in real time.

Reach, reactions, approval rate,
consistency.

938

posts

92%

approved

21,589

reactions

✓ On a real account

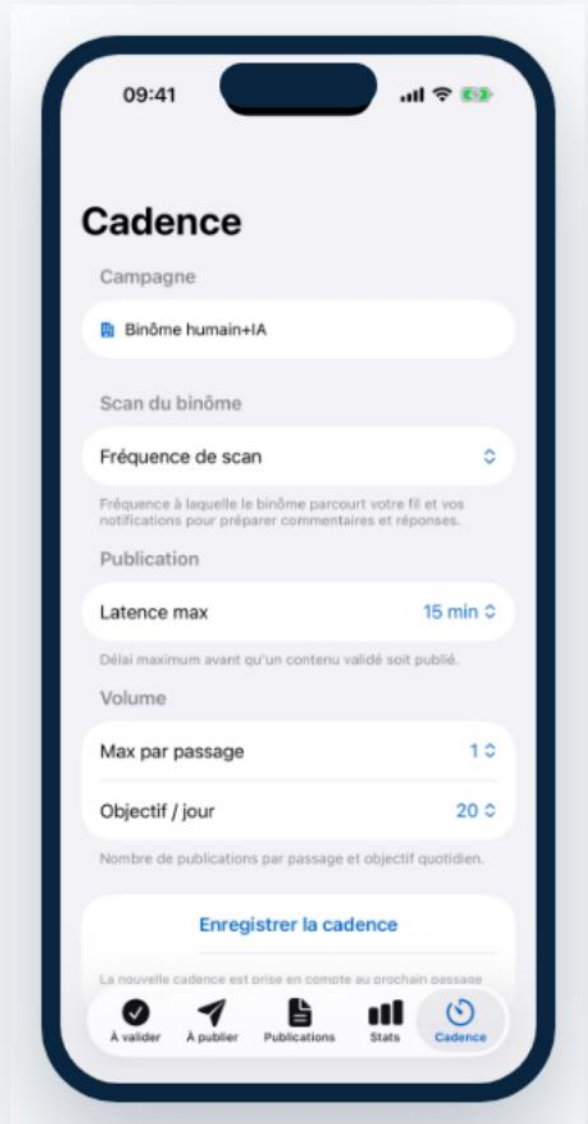

— THE PLATFORM · CADENCE

You set the rhythm.

🕒 Scan frequency, number of publications per pass, cadence on the feed as well as on your profile.

✓ **You decide the intensity.**

▶ **Your settings, your sliders**

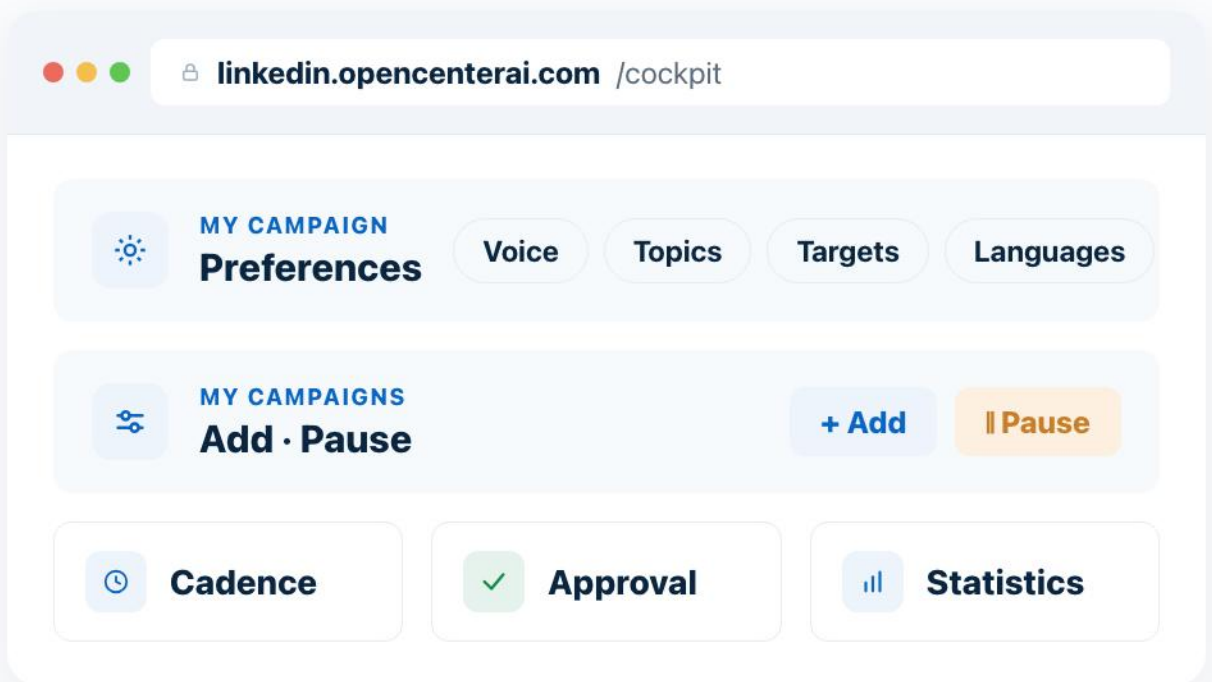

— THE PLATFORM · CAMPAIGNS

Configure, add, pause — in one click.

Set your voice, your topics, your targets, your languages. Run **several campaigns**, pause one whenever you want — from the web cockpit.

— FOUR CAMPAIGN MODES

Four ways to own the field.

Profile post

We write and publish on **your profile** (posts + infographics), in your voice.

News feed

We comment on the **right posts** in your feed, where your prospects are.

Profile + Feed

Both at once, for maximum visibility.

Events

Fill an event: target, invite, track sign-ups (webinar, training, trade show, recruiting...).

— AT SCALE

More, everywhere, in every language.
