## 🔍 PROFILE

AI architect and entrepreneur, 20+ years. I run Claude (Anthropic) in production every day. As a two-person duo, we have shipped about ten cross-domain AI products to production, roughly 11 days each (221k+ lines of code, 161 APIs). The rare skill isn't the model, it's the orchestration around it: verifiable specifications, permission guardrails, human validation. Executive track record: founder of Oxado (a European competitor to Google AdSense), COO of DroneVolt through its IPO on EURONEXT.
